Creating Media – Audio Production.

For this unit, we will be exploring how to create our own audio files with different recording software. We will learn to record, playback, edit and share our files with our peers and then give feedback on each other's work.
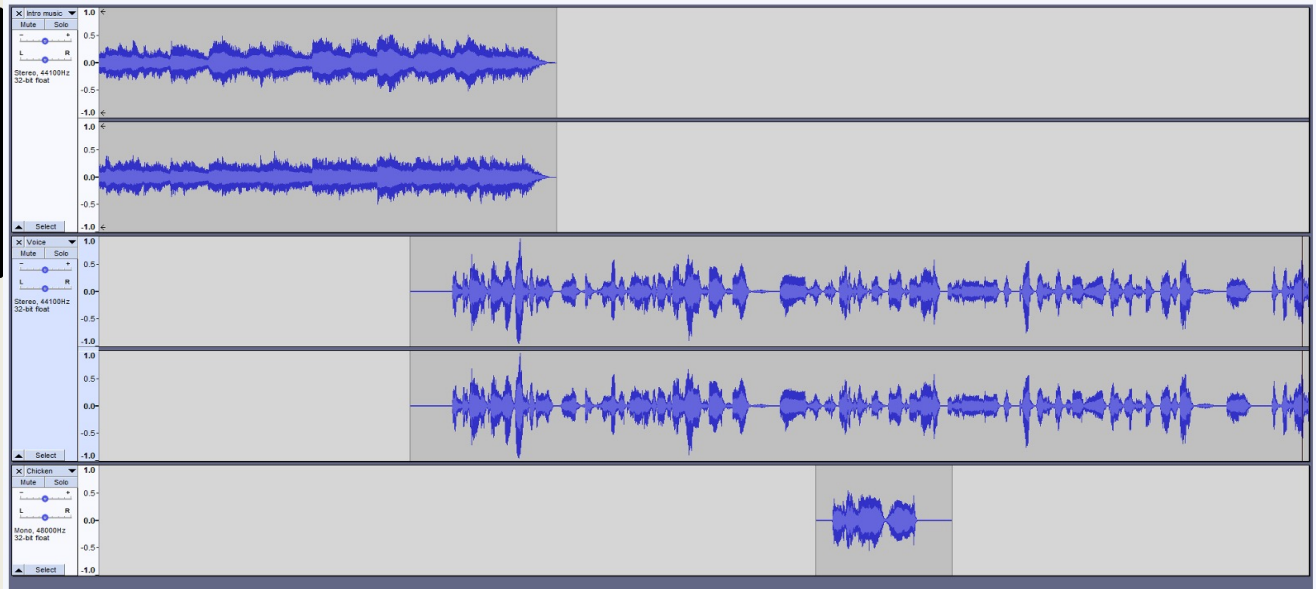

Input devices

Output devices

We will also be exploring how different devices record and playback audio. Some computers use speakers and microphones that are connected. Other devices use external speakers and microphones that must be connected.

Which type of recording equipment do you think will be the best?

WORD AWARE
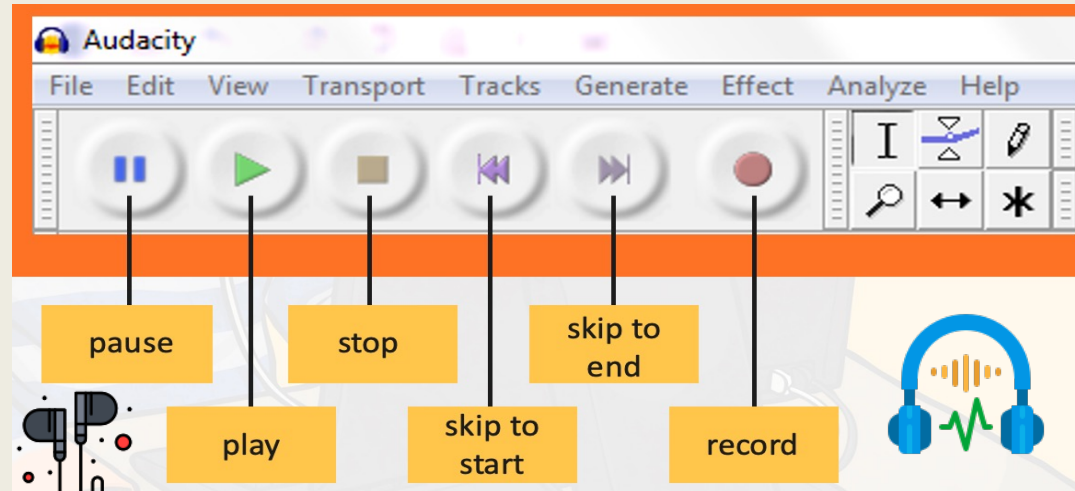

?

KEY WORDS

Audio	sound, especially when recorded, transmitted, or reproduced.
Microphone	an instrument for converting sound waves
Input	the action of putting something in.
Output	the action or process of producing something
Podcast	a digital audio file made available on the internet
Playback	the repeat of previously recorded sounds
Edit	Change, remove, add or move parts of the programme around.

One of the main pieces of software we will be using is Audacity. It allows us to record all our sounds and then put them together in whichever order we chose!

We are going to create a podcast!
